Education

Expected June 2015   Eastern Washington University   Cheney, WA
Bachelor of Science in Computer Information Systems
Minor in Web Programming and Focus in Business Management

 June 2010   Walla Walla Community College   Walla Walla, WA
Associates in Arts and Science in Informatics of Networking

Projects

- **SMS Blaster:** The SMS blaster is a web application that uses a database which will allow users to connect to the site. It will manage customers, send an e-mail, or send a text message to all of the company's customers.
- **Website:** I am currently building a website using HTML markdown on codepen, and translating it into HTML in sublime text. By doing this, I can focus on the CSS aspect of the page faster.
- **Trivia Maze:** This is a group project that was built in .NET. The Trivia Maze incorporated database handling created stories for completion on the current iteration, and used GitHub version control.

Computer Skills

Proficient: Adobe Photoshop, Adobe Illustrator, Adobe InDesign, Java Programming, HTML,
            PHP programming, Networking
Knowledge of: C programming, CSS, Joomla, C#, SQLite

Work Experience

July 2006 – Present   Albertsons'   Walla Walla, WA
Administration

- I help customers by providing great customer service which includes: handling refunds, finding products they cannot find on the shelf, answering ad questions, helping check the customer out as a cashier, and making sure that products are easily accessible.
- I order the freight for the Home Health and Beauty department, rotate products on the shelf, work the back stock, organize the inventory in the back room, count the inventory, and handle the resets when necessary.
- I update all tags in the store, verify that new product tags are ordered, and resolve price variances at the check stand.

September 2010 - June 2011   Eastern Washington University   Cheney, WA
Mars Lab Assistant

- I have assisted students with using Adobe products on their homework projects. This included printing out assignments, posters, and fixing any issues on the layouts.

June 2008 – June 2009   Walla Walla Community College   Walla Walla, WA

Student Aid

- I aided the IT department with troubleshooting any computer issues that the teachers may have had. Other tasks that I assisted with include: setting up the labs with imaging software, making sure the wires are properly secured, and monitoring the campus labs when necessary.
